**To:** PRINCIPAL, Leyburn State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate  
B. Scope is partially correct, however additional spaces are required  
C. Scope is partially correct, however fewer spaces are required  
D. Scope is not at all accurate

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

#### Instructions

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

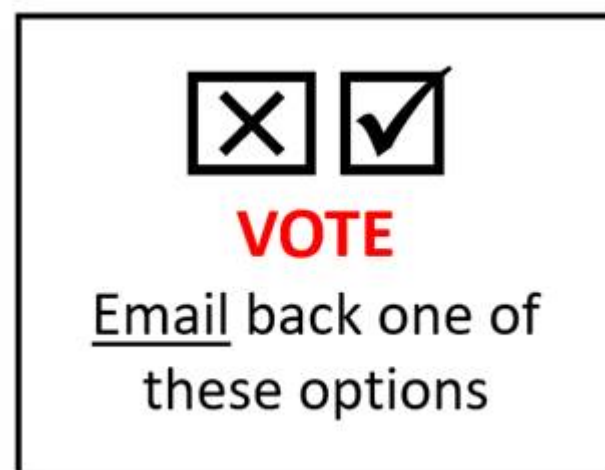

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate  
B. Scope is partially correct, however additional spaces are required  
C. Scope is partially correct, however fewer spaces are required  
D. Scope is not at all accurate

**To:** PRINCIPAL, Macleay Island State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate  
B. Scope is partially correct, however additional spaces are required  
C. Scope is partially correct, however fewer spaces are required  
D. Scope is not at all accurate

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

#### Instructions

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 12:26 PM  
**To:** PRINCIPAL, Mansfield State High School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

#### Instructions

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

#### Instructions

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 12:22 PM  
**To:** PRINCIPAL, Marshall Road State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate  
B. Scope is partially correct, however additional spaces are required  
C. Scope is partially correct, however fewer spaces are required  
D. Scope is not at all accurate

**To:** PRINCIPAL, Miami State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

#### Instructions

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate  
B. Scope is partially correct, however additional spaces are required  
C. Scope is partially correct, however fewer spaces are required  
D. Scope is not at all accurate

**To:** PRINCIPAL, Moorooka State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

#### Instructions

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**Sent:** Friday, 28 February 2020 12:14 PM  
**To:** PRINCIPAL, Highfields State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

#### Instructions

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**To:** PRINCIPAL, Hercules Road State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

#### Instructions

**To:** PRINCIPAL, Helensvale State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 12:09 PM  
**To:** PRINCIPAL, Murarrie State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

#### Instructions

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**Sent:** Friday, 28 February 2020 12:07 PM  
**To:** PRINCIPAL, Musgrave Hill State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

#### Instructions

**To:** PRINCIPAL, Harristown State High School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**To:** PRINCIPAL, North Arm State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate  
B. Scope is partially correct, however additional spaces are required  
C. Scope is partially correct, however fewer spaces are required  
D. Scope is not at all accurate

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 11:57 AM  
**To:** PRINCIPAL, Greenslopes State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate  
B. Scope is partially correct, however additional spaces are required  
C. Scope is partially correct, however fewer spaces are required  
D. Scope is not at all accurate

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 12:01 PM  
**To:** PRINCIPAL, Nerang State High School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

#### Instructions

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

#### Instructions

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate  
B. Scope is partially correct, however additional spaces are required  
C. Scope is partially correct, however fewer spaces are required  
D. Scope is not at all accurate

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 11:53 AM  
**To:** PRINCIPAL, Ormiston State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate  
B. Scope is partially correct, however additional spaces are required  
C. Scope is partially correct, however fewer spaces are required  
D. Scope is not at all accurate

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

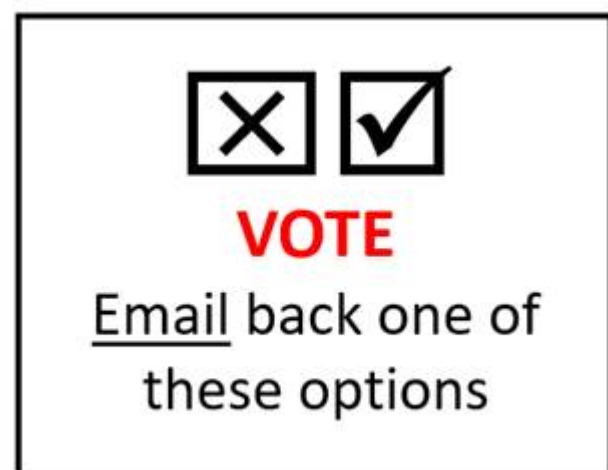

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**To:** PRINCIPAL, Glass House Mountains State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**To:** PRINCIPAL, Runcorn State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**To:** PRINCIPAL, Scarborough State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**Sent:** Friday, 28 February 2020 11:23 AM  
**To:** PRINCIPAL, Deception Bay North State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results.

**Instructions**

1. Please provide a reply email.
2. Reply with one of these options. If you provide no further information that is okay. The program team will contact you seeking clarification in due course.
3. You can write additional details if you wish.

- A. Scope is complete and accurate**  
**B. Scope is partially correct, however additional spaces are required**  
**C. Scope is partially correct, however fewer spaces are required**  
**D. Scope is not at all accurate**

**To:** PRINCIPAL, Currumbin State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

**Instructions**

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**To:** PRINCIPAL, Seville Road State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

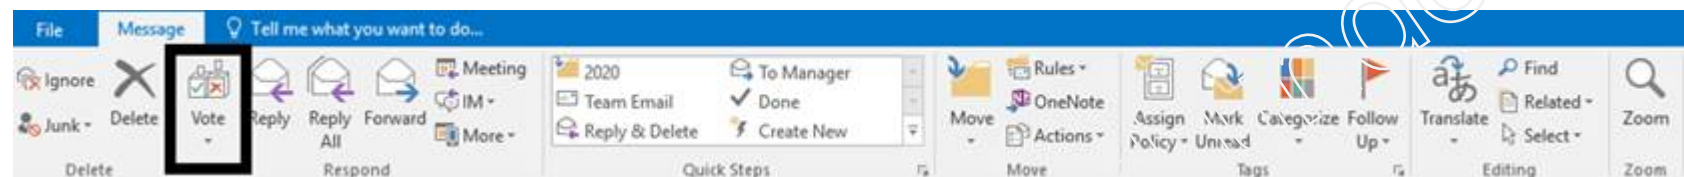

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

**Instructions**

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**Sent:** Friday, 28 February 2020 10:10 AM  
**To:** PRINCIPAL, Springwood State High School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

**Instructions**

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

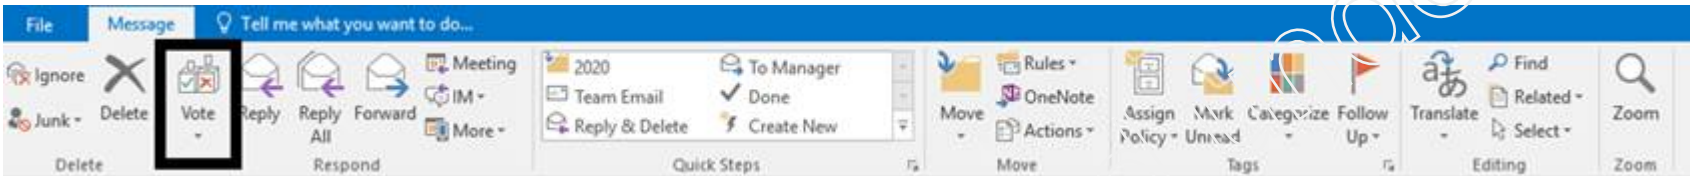

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**To:** PRINCIPAL, Sunnybank Hills State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

## SMITH, Andrew

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 10:05 AM  
**To:** PRINCIPAL, Sunnybank State High School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**To:** PRINCIPAL, Coombabah State High School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

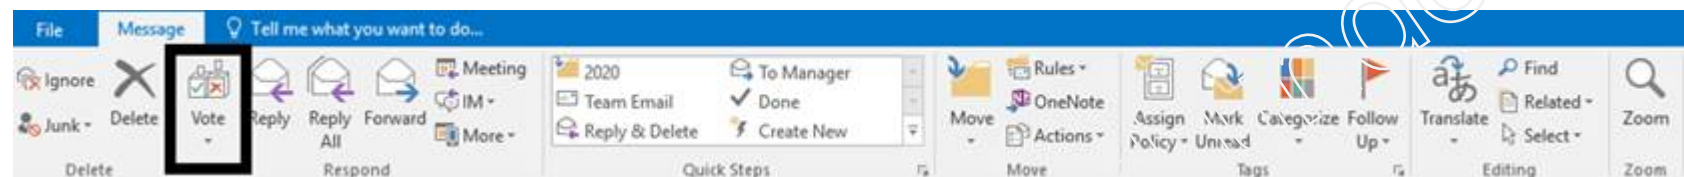

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**To:** PRINCIPAL, Coolum State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

**Instructions**

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

**Instructions**

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 10:03 AM  
**To:** PRINCIPAL, Coomera Rivers State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

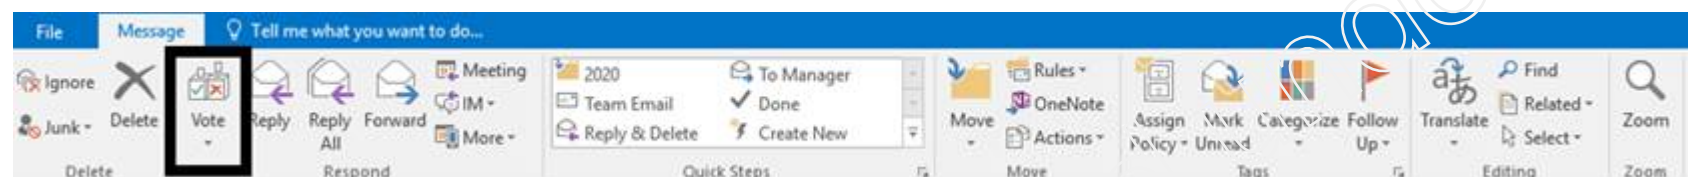

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

**Instructions**

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 9:58 AM  
**To:** PRINCIPAL, Taigum State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**To:** PRINCIPAL, Talwood State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

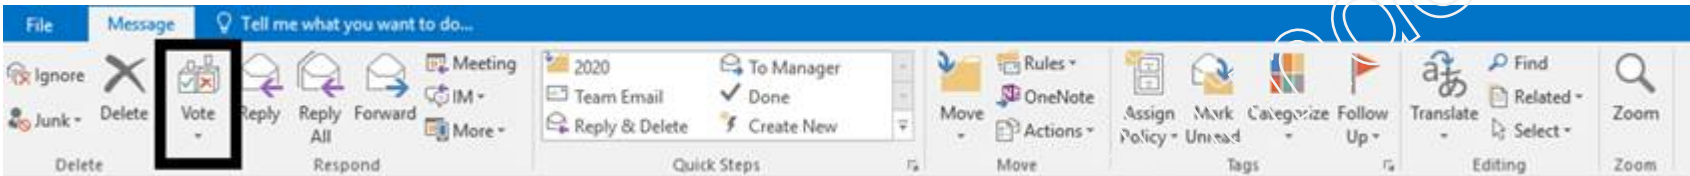

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

**Instructions**

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**Sent:** Friday, 28 February 2020 9:55 AM  
**To:** PRINCIPAL, Clifford Park Special School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

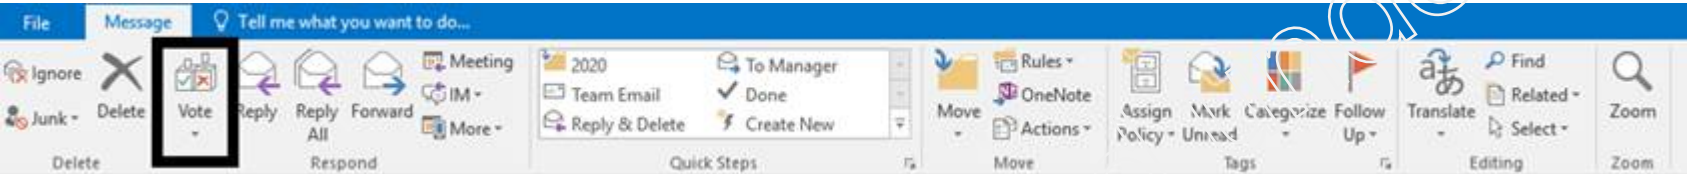

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

Instructions

- 1. Open or double click email to open in full screen mode
- 2. Review the list of spaces below.
- 3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

Released under RTI Act by DOE

**SMITH, Andrew**

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 9:54 AM  
**To:** PRINCIPAL, Thornlands State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**To:** PRINCIPAL, Thulimbah State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**To:** PRINCIPAL, Chancellor State College  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

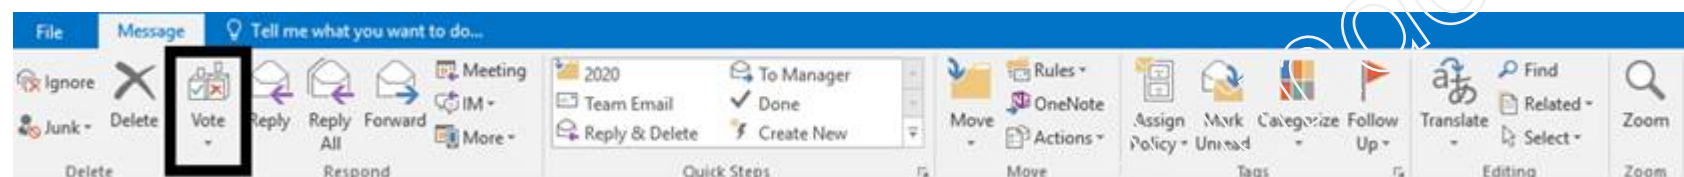

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 9:50 AM  
**To:** PRINCIPAL, Toowoomba State High School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

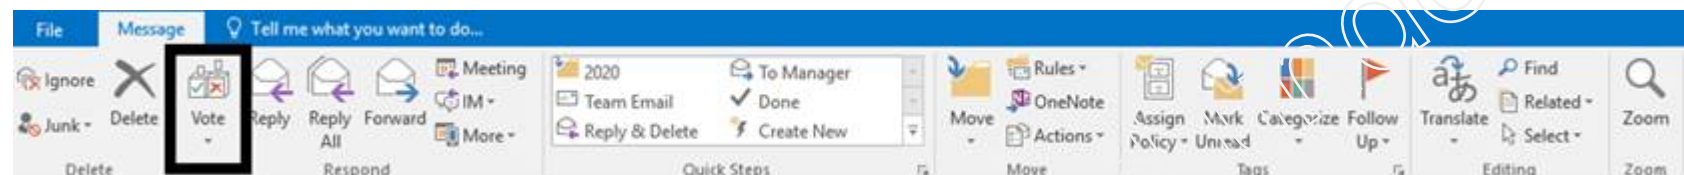

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

**Instructions**

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

## SMITH, Andrew

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 9:48 AM  
**To:** PRINCIPAL, Cavendish Road State High School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

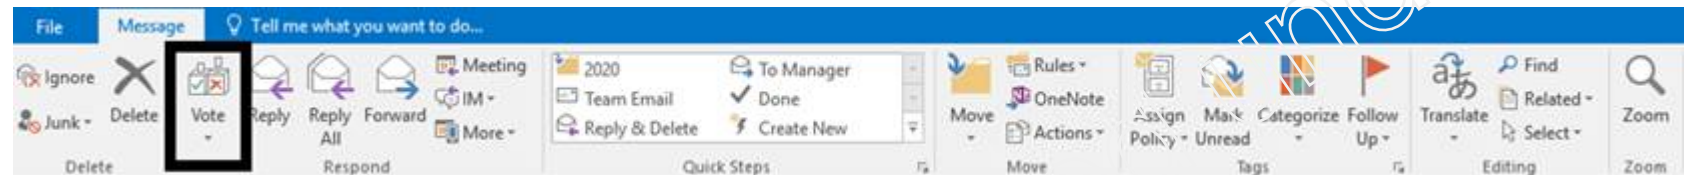

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

## SMITH, Andrew

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 9:46 AM  
**To:** PRINCIPAL, Capalaba State College  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**SMITH, Andrew**

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 9:46 AM  
**To:** PRINCIPAL, Upper Coomera State College  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

**Instructions**

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

## SMITH, Andrew

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 9:46 AM  
**To:** PRINCIPAL, Caningeraba State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

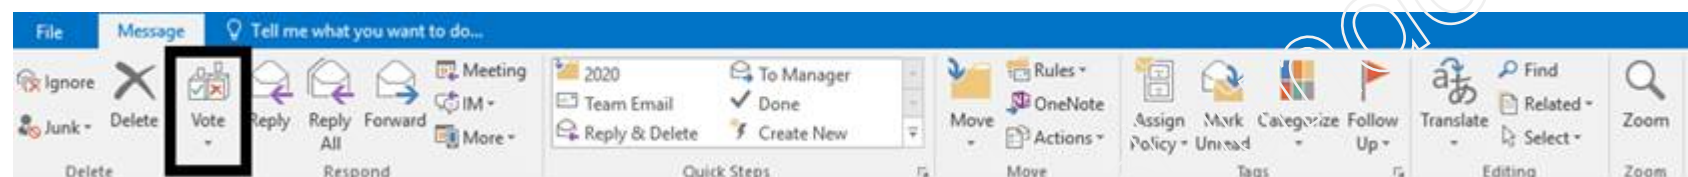

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

SMITH, Andrew

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 9:44 AM  
**To:** PRINCIPAL, Caloundra State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

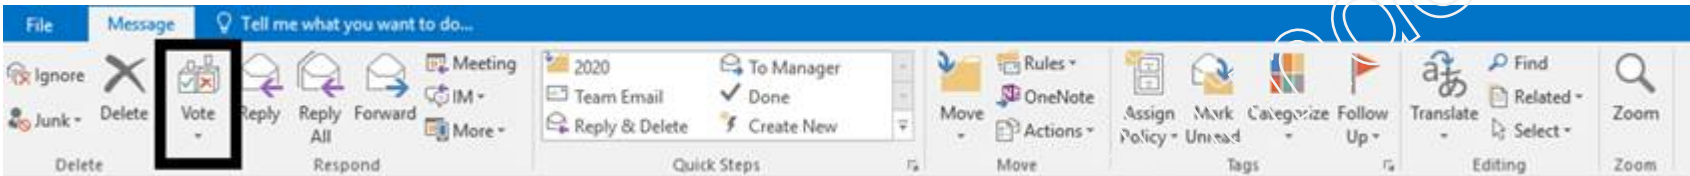

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

**Instructions**

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**To:** PRINCIPAL, Caboolture East State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

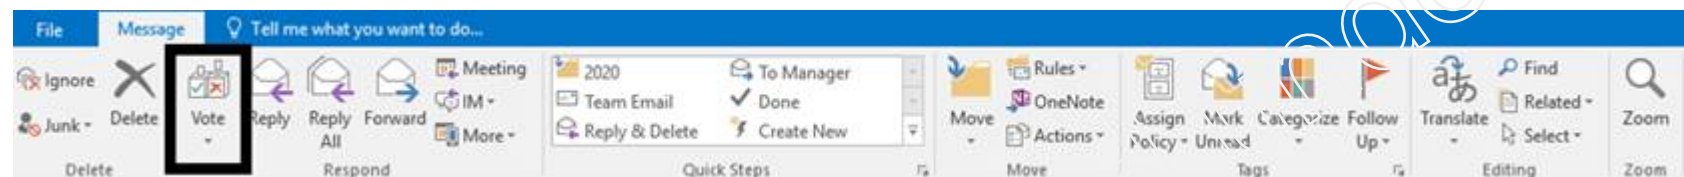

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**Sent:** Friday, 28 February 2020 9:34 AM  
**To:** PRINCIPAL, Burnside State School  
**Subject:** FW: Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

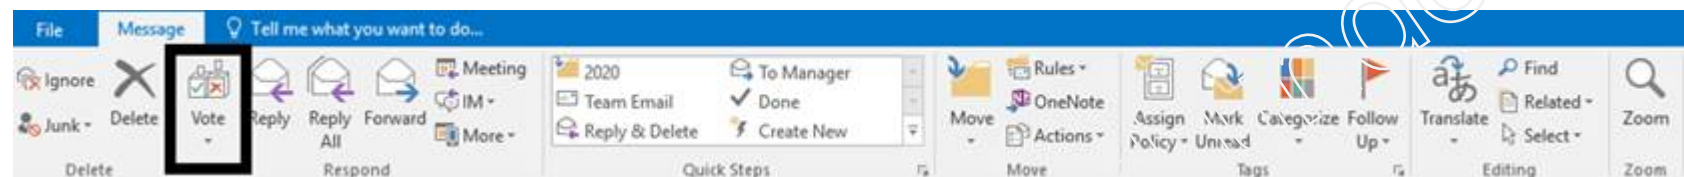

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

Centre Code	Centre Name	Structure Local Name	Functional Location (Room)	Room Local name	Room Type	One School Number

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 9:26 AM  
**To:** PRINCIPAL, Wamuran State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

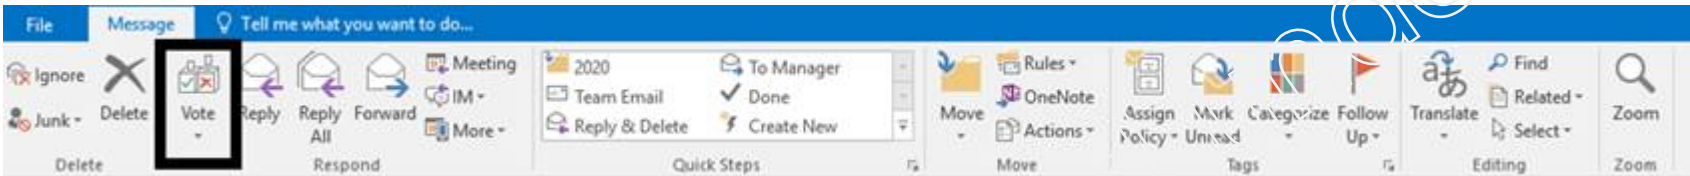

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

**Instructions**

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**To:** PRINCIPAL, Warwick East State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

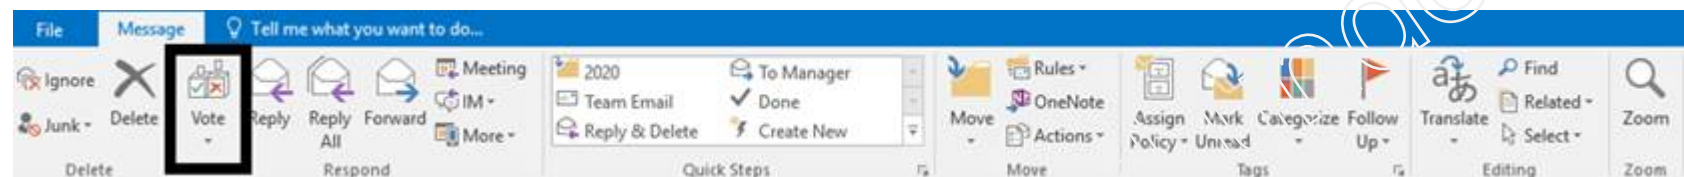

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

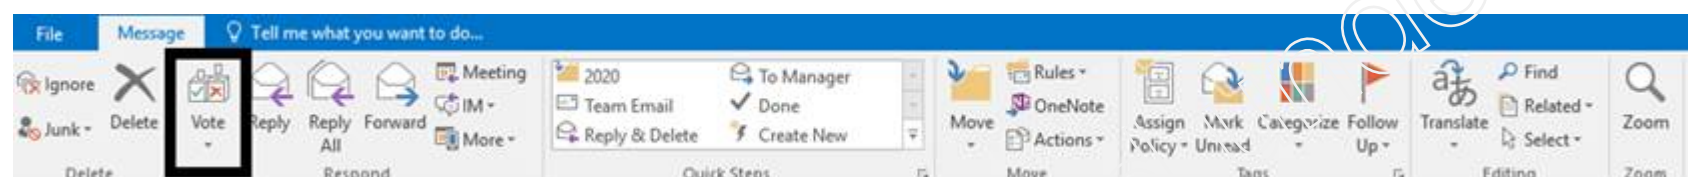

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

**Sent:** Friday, 28 February 2020 9:23 AM  
**To:** PRINCIPAL, Bracken Ridge State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 9:19 AM  
**To:** PRINCIPAL, Birkdale State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

Released under RTI Act by DOE

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 9:20 AM  
**To:** PRINCIPAL, Bli Bli State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

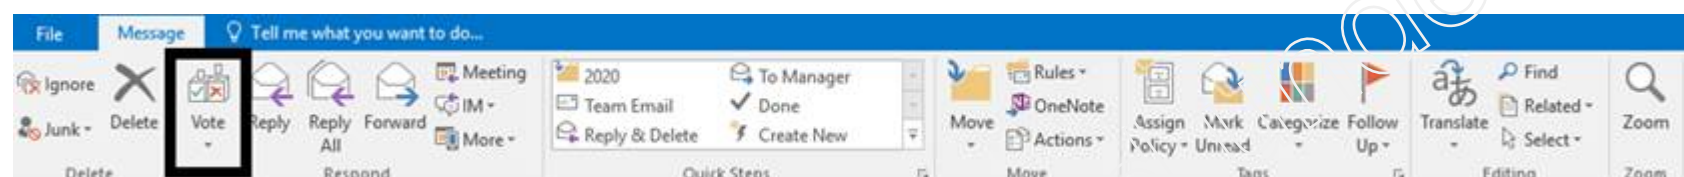

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**Sent:** Friday, 28 February 2020 9:17 AM  
**To:** PRINCIPAL, William Duncan State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

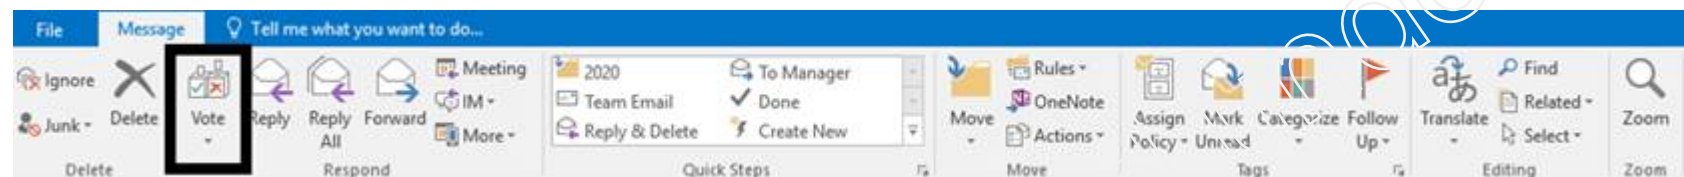

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**Sent:** Friday, 28 February 2020 9:15 AM  
**To:** PRINCIPAL, Belmont State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

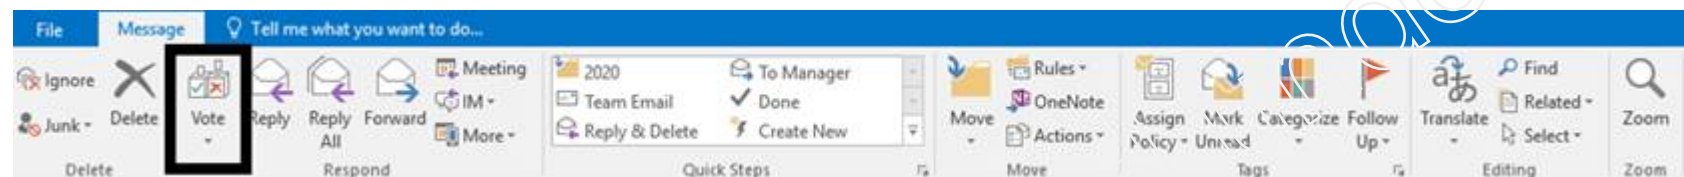

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

SMITH, Andrew

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 9:13 AM  
**To:** PRINCIPAL, Windaroo State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

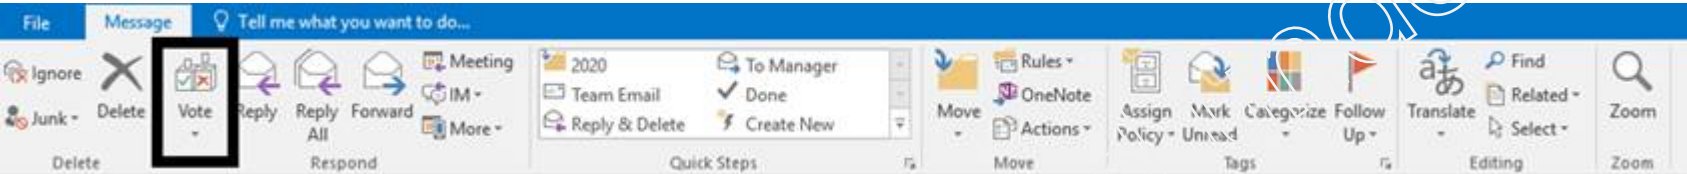

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

Instructions

- 1. Open or double click email to open in full screen mode
- 2. Review the list of spaces below.
- 3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 9:04 AM  
**To:** PRINCIPAL, Woongoolba State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

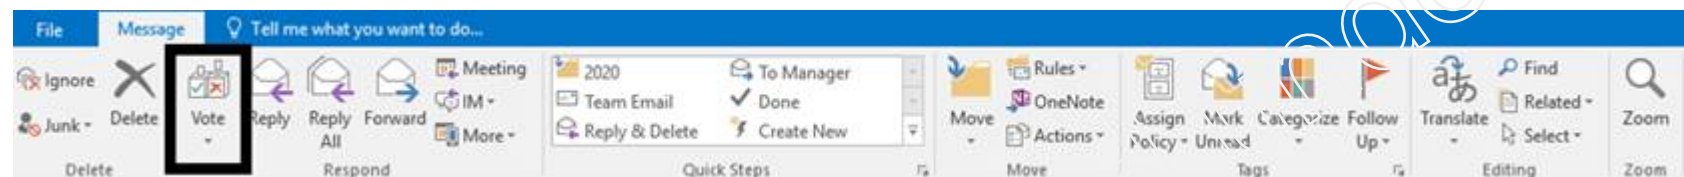

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 9:01 AM  
**To:** PRINCIPAL, Aviation High  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

#### Instructions

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 8:59 AM  
**To:** PRINCIPAL, Wynnum West State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

**Instructions**

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

**Sent:** Friday, 28 February 2020 8:56 AM  
**To:** PRINCIPAL, Yangan State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

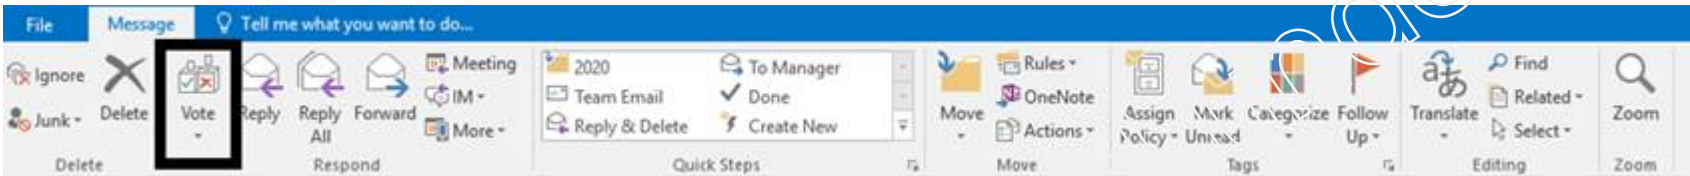

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

**Instructions**

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.

SMITH, Andrew

**From:** Infrastructure, AirCon  
**Sent:** Friday, 28 February 2020 8:52 AM  
**To:** PRINCIPAL, Amiens State School  
**Subject:** Cooler Cleaner Schools Program

Dear Principal,

On 27 February 2020 the Queensland Government announced the Cooler Cleaner Schools Program (CCSP), which will provide a total funding package of more than \$477 million over four years to air condition Queensland state schools and expand the existing Advancing Clean Energy Schools (ACES) program.

Under the CCSP, all Queensland state school classrooms, libraries and staffrooms will be air conditioned by the end of June 2022. Working with QBuild, the Department of Education (DoE) will be progressively releasing packages of work over that period, informed by heat discomfort data, the size and complexity of installation, tender value, and equipment and local contractor availability.

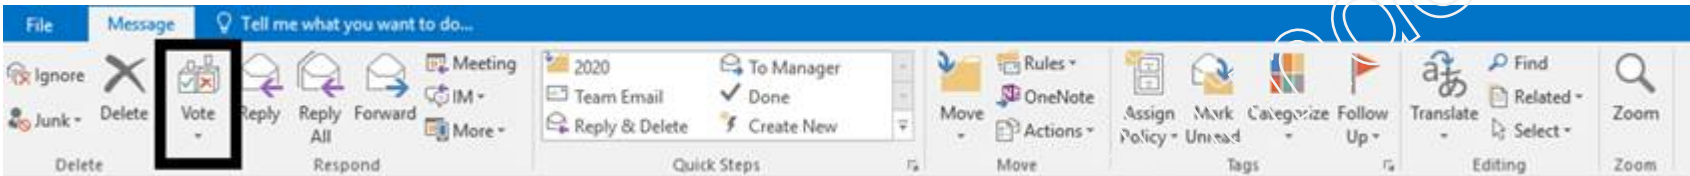

DoE has undertaken an assessment of each school within the program to better understand the school's air conditioning requirements. The results of the assessment for your school are listed below. These are the classroom, staff room and library spaces that were found to be without air conditioning.

The purpose of this email is to seek your feedback on these results. We ask that you do this by making a selection using the 'Vote' button above.

**Instructions**

1. Open or double click email to open in full screen mode
2. Review the list of spaces below.
3. Up the top of this email, use the 'Vote' button (see image below) above to provide your feedback regarding the proposed installation scope. The following options have been provided;
  - Scope is complete and accurate.
  - Scope is partially correct, however additional spaces are required.
  - Scope is partially correct, however fewer spaces are required.
  - Scope is not at all accurate.

If you have any questions about the assessment results or CCSP more broadly, please refer them to the Air Conditioning team at [AirCon.Infrastructure@qed.qld.gov.au](mailto:AirCon.Infrastructure@qed.qld.gov.au), or call 07 3328 6567.
