22/10/2013	21/10/2013	INC-45684	1983	Agnes Water State School	s.47(3)(b) - Co		11
<b>Incident Summary</b> As a Teacher Aide in one of the Prep classes I was receiving training from s.47(3)(b) - Co on the finger prick procedure involved in testing blood glucose levels. I was inadvertently pricked by a used stick. s.47(3)(b) - Co described it as a low-risk incident and suggested I be checked by a GP.							
18/03/2014	17/03/2014	INC-53389	2155	Albany Creek State High School		s.47(3)(b) - Conti	11
<b>Incident Summary</b> As s.47(3)(b) - Co was setting up her sewing machine she accadently sewed her finger. The needle broke off.							
18/03/2014	17/03/2014	INC-53311	2155	Albany Creek State High School		s.47(3)(b) - Co	9
<b>Incident Summary</b> s.47(3)(b) - Co wanted to see how another student managed to sew his finger. He went over to her machine, which had a broken needle. He turned it on, put his finger under the needle and put his foot on the foot - sewing through his finger with a blunt needle.							
23/07/2015	23/07/2015	INC-82804	2017	Aldridge State High School		s.47(3)(b) - Con	10
<b>Incident Summary</b> While using the sewing machine s.47(3)(b) - Co slipped her finger under the needle by accident and the needle punctured her fingernail and the tip of the finger causing a small wound. The needle went in and out cleanly and the wound bled very minimally.							
14/05/2014	4/04/2014	INC-56583	2175	Alexandra Hills State High School		s.47(3)(b) - Conti	6
<b>Incident Summary</b> student sewed finger (threading needle but put foot on pedal whilst doing so)							
30/10/2014	29/10/2014	INC-67352	155	Allenstown State School		s.47(3)(b) - Co	11
<b>Incident Summary</b> Whilst emptying the paper towel bin in Staff Toilet at K Block, Prep I felt a prick on left hand middle finger. I noticed an Insulin Needle Cap within the used paper towels. The needle had pricked my finger.

26/07/2013	26/07/2013	INC-40054	115	Amberley District State School	s.47(3)(b) - Contra		11
<b>Incident Summary</b> After giving a child an insulin shot I was distracted by another child running into the classroom as I was disposing the needle and I pricked my finger.							
19/11/2015	17/11/2015	INC-91114	440	Annandale State School	s.47(3)(b) - Cont		14
<b>Incident Summary</b> A basketball thrown by a student at full strength hit my left arm extremely hard while I was supervising playground duty. Also hit on the right back of hip by a second ball. The ball was thrown instead of being put away gently. My arm is still quite sore and now I have pins and needles most of the day.							
21/08/2014	21/08/2014	INC-63213	296	Ascot State School	s.47(3)(b) - Cor		11
<b>Incident Summary</b> Child found a needle in the gutter on the way to school - an Accucheck device. Teacher discovered device during middle session of the teaching day and realised that the child had pricked his finger. Teacher reported to office - Deputy Principal who rang the parents. Father collected child to take to doctor.							
11/11/2013	28/10/2013	INC-47069	3031	Aspley Special School	s.47(3)(b) - Co		16
<b>Incident Summary</b> while whipper snipping the grounds a needle was hit by the machine and went into my left leg below the knee.							
26/03/2014	26/03/2014	INC-54149	2051	Atherton State High School	s.47(3)(b) - Cont		16
<b>Incident Summary</b> s.47(3)(b) was sewing and has placed her finger too close to the machine needle and the needle has penetrated her finger.							
7/12/2015	4/12/2015	INC-92458	5289	Ayr SHS - Special Education Program	s.47(3)(b) - Cont		11
<b>Incident Summary</b> Student had collapsed in A01 while I was present. I sent a student runner to get her testing kit. I retrieved gloves. I tested her BGL. As I was packing the kit away I felt the prick on my finger and observed bleeding. I checked the pricker and discovered it had jammed and not retracted.

<p><b>Incident Summary</b> The mixing of resing using the catalyst MEKP had just been demonstrated to the class. Some time after the demonstration, s.47(3)(b) - Co a student picked the apparently empty syringe and squirted it towards another student, s.47(3)(b) - Co. A very small amount of MEKP still in the syringe squirted out, a little getting into s.47(3)(b) eye.</p>							
13/06/2013	12/06/2013	INC-37962	158	Beaudesert State School		s.47(3)(b) - Contr	11
<p><b>Incident Summary</b> s.47(3)(b) was in the Eco Area when she stood on a piece of wood with a nail sticking out of it. The nail went through her shoe into the sole of her foot.</p>							
21/12/2015	9/12/2015	INC-92904	681	Beechmont State School		s.47(3)(b) - Conti	10
<p><b>Incident Summary</b> On the second day of the assesment and rating i felt very tight in neck and shoulders. The following day I spoke to my son about my jaw and teeth being sore. Over the next 4 days I was at home on leave relaxing. As it was raining I was able to lay in bed. The pain in my jaw was increasing. Sunday the 13th I took pain relief. On Monday the 14th I noticed the pain had increased and took pain relief when I was moving the pain seemed to settle. On Tuesday 15th I returned to work. I dropped my children to my sister and commented that I wasn't feeling well and that my jaw was sore. I began work for the day. I noted that when I sat at my desk I had pain radiating into my face. I took pain relief. By approx 10.30am I was in extreme pain and I asked my supervisor s.47(3)(b) - ( if I could walk across to the massage palce across the road. s.47(3)(b) agreed and I walked to the massage place. The massage therapist was not available and so I walked to the physiotherapist and asked if sometone could see me. They said they had an appointment at 12pm. I walked back to work and let s.47(3)(b) know. I went to the appointment. The physiotherapist asked about my work station and I explained that we use ipads in the fields and she explained that when you drop your jaw it can cause problems in the neck. She said that I had restricted C3 and C4 movement which is where the trigiminal nerve meets the brain stem. She carried out mobilisation, accupuncture and tapped my back into a shoulder back posture to stop my jaw dropping forward. I made an appointment for 7.30 am the following day (wed 16th December) On the way home I stopped at the chemist and purchased panadol and coedine to try and control the pain. On Tuesday and wednesday prior to taking the pain eleif I was unable to sit down, only stand or lay downThe following day I went to the appointment and was still in extreme pain. After mobilisation and accupuncture and strapping , I saw the GP .I went to my GP who asked me to get my teeth checked andf prescribed LYRICA pain relief. I began taking the LYRICA on WED 16th. On Wednesday and Thursday I was unable to drive due to the pain relief. Thursday I was bale to sit down again.My mother drove me to see the physio on Thursday the 17th. I was mobilised, strapped and given accupuncture. I made an appointment with the dentist on Friday 18th. The dentist took xrays and did not identify any major issues with my teeth. He did shave one of my back teeth down a bit where a point may have been contributing to the pain in the jaw area. I purchaed a lumber roll recommended by the physio and a mouth guard to wear at night. I purchased a chair support for my work desk. I went to physio on the 21st. The physio put needles in my face and upper back strapped my back. I returned to work and my colleagues assisted me in rearranging my work space. Lifting the screens, moving the screens and putting the bolster on my chair.</p>

6/06/2013	6/06/2013	INC-37559	3051	Beenleigh Special School			
<p><b>Incident Summary</b> s.47(3)(b) - Co entered room where a medical procedure was taking place for a student requiring an insulin reading. After the procedure was performed on the diabetic student the needle was picked up by s.47(3) who after playing with the needle stated he injected himself. The needle was the lancing device that is used to obtain a blood sample from the student. Initial conversations with staff around this and the unsurity of whether this occured or not led to the Principal making a decision with the HOC to call s.47(3) Mother and notify her of the incident. Further investigation by the school nurse and myself led to the decision that there was no possible way the needle could be re-fired. s.47(3) Mum was shown the device and reassured this one would not inflict a needle prick. Concern is that the needle used after this one for the injection of insulin is not a protected needle which could inflict a cross contamination if other students are present during the procedure.</p>							
20/02/2015	18/02/2015	INC-72504	2084	Beenleigh State High School		s.47(3)(b) - Cont	11
<p><b>Incident Summary</b> s.47(3)(b) - recieve a needle stick injury while on farm. She did not have permission to be there during lunch 2.</p>							
1/03/2013	28/02/2013	INC-31063	2239	Bentley Park College - Special Education Program		s.47(3)(b) - Cor	14
<p><b>Incident Summary</b> As per s.47(3)(b) - Contra incident report attached - While covering for s.47(3)(b) - Co on bus duty, student s.47(3)(b) - C did a runner. I had to prevent him from leaving F Block area. I was in a back brace and had to run after student, on ce I stopped him, I started to walk him back, when he suddenly dropped to the ground with no warning. I was caught by surprise but the jolt has upset my pre-existing injury to no end. Extra strain on spine and lower back, also arms, shoudler and legs. Today (01/03/12) pins and needles in both legs and feet, right shoulder and lower back (Siatica) extremely agilated.</p>							
4/11/2013	4/11/2013	INC-46582	2085	Biloela State High School			
<p><b>Incident Summary</b> Whilst sewing denim, s.47(3) needle broke and a part of the needle flicked up and hit her in the eye.</p>							
1/06/2015	29/05/2015	INC-79624	2085	Biloela State High School		s.47(3)(b) - Co	11
<p><b>Incident Summary</b> Student got a needle in her finger from the sewing machine</p>

28/03/2013	27/03/2013	INC-33364	396	Blackwater State School		s.47(3)(b) - Cor	14
<b>Incident Summary</b> s.47(3) was playing in the Development Cup Squad on the Emerald State High School oval against Springsure. As she was tackled by the opposing No.10 player she landed heavily underneath his weight. When the player got up he stood on her wrist. At that point she felt some pain, but continued to play the game. This tackle happened just before half time. During half time s.47(3) mentioned it was a little sore, but that she wanted to continue playing. Later that night when she arrived back home (at approximately 8:00pm) she told her mum that her wrist was hurting quite a bit more and that she had pins and needles in her fingers. She was taken to the hospital for xrays and found it to be broken.							
8/08/2014	8/08/2014	INC-62329	396	Blackwater State School		s.47(3)(b) - Cd	8
<b>Incident Summary</b> s.47(3) was reaching up with her left arm to secure the library front door, as the panel was loose. On reaching up to lock the latch she felt a sudden pain to the left shoulder and across the top of the left shoulder area. Following the incident she felt pins and needles travelling down her arm, with occasional pins and needles to the hand and fingers (no numbness).							
21/05/2015	21/05/2015	INC-78841	1565	Blair State School		s.47(3)(b) - Cor	7
<b>Incident Summary</b> I was standing on a path about 5m away from s.47(3)(b) - . He threw a stick at me hitting me on my left elbow. The stick broke on impact. my forearm went numb then pins and needles. Later I had pain up my upper arm. this was witnessed by s.47(3)(b) - Contr							
1/06/2014	21/05/2014	INC-58116	344	Bluff State School			
<b>Incident Summary</b> s.47(3) took a tea towel out of the cutlery draw in the staff room and shook it open. When she did this, a syringe fell to the ground. She picked it up thinking that it was to give medicine to a child (like neurofen). It had a red top on it and she pulled it off and saw that there was a long needle pointing out the top. She spoke to s.47(3)(b) (Teacher Aide) about it before informing me. I called s.47(3) immediately (ESO) and she told me to call s.47(3)(b) - Co. s.47(3) told me to call s.47(3) s.47(3) I called s.47(3) a few times and left a voice message. There was no reply so I put the needle in a plastic bag and placed it into the safe for overnight. I called s.47(3) again in the morning and she told me to dispose of it at the police station and to advise the staff of the matter. That afternoon I called in all staff for an emergency staff meeting and explained what was found and how it is being dealt with. I asked them to be very vigilant and careful around the school.

<p><b>Incident Summary</b> At approximately 305-310pm I left Lower Administration with another HOD (s.47(3)(b) - C) and was on the footpath near my car. I noticed s.47(3)(b) dad and s.47(3)(b) come down the hill from upper administration. He walked past myself and s.4 and then turned around once I was recognised. He said "s.47(3)(b) did you tell s.47(3)(b) to pick up a needle?" ZI replied "no, I did NOT tell s.47(3)(b) to pick up a needle. I explained that I had a discussion about the risk to younger children and what he could do next time. The dad refused to listen and became angry and agitated. He was extremely close to me and was making direct eye contact. He said that I knew he was a druggie once and that's why I said this. He also told s.47(3)(b) to me there were no needles in his house. I said that I was not aware of his background. I was feeling extremely disempowered and embarrassed as I knew there were people watching...students and cars driving past. He refused to let me speak. I said that we needed to go back into admin to sort this out with a Deputy or Principal. s.47(3)(b) dad replied with "Im not doing that I will be sorting this out myself, I will be speaking with s.47(3)(b) (who was with s.47(3)(b) on the said day) and his mum and I will be going to education about this and I will make sure its sorted." s.47(3)(b) and himself proceeded to get in their car and drove off. I returned to lower admin for support and s.4 returned from attempting to find a deputy.</p>

<b>Incident Summary</b> Child appeared with excessive bleeding from his nose (in the classroom while working)							
12/05/2015	24/04/2015	INC-77908	2116	Caloundra State High School		s.47(3)(b) - Co	2
<b>Incident Summary</b> s.47(3) received the flu vaccination needle and then immediately suffered a reaction - she fainted. She came to and was sat down but then fainted again. s.47(3) was tended to by the nurse administrating the vaccination and by another staff member s.47(3)(b) - Contra (from office). s.47(3) was laid on the floor with her feet up but continued to 'pass out' (periods of time where she was unresponsive, limp and breathing very snarow). I came into the room with s.47(3) lying on the floor and the staff waiting for their vaccination still in the room - they appeared unaware of what s.47(3) was experiencing. s.47(3) complained (limited speech) of her mouth feeling a little swollen and her tongue a little thick (she kept swallowing). s.47(3) continued to have the blank episodes (appeared similar to 'petit mal' seizures) every minute or so. The nurse then administered an adrenaline shot and the ambulance called. The staff were then sent from the room by myself and I continued to monitor s.47(3) (on floor holding her hand) with s.47(3) and the nurse. The ambulance arrived and took her measurements and then removed her to hospital.

4/02/2014	4/02/2014	INC-49856	7362	Dalby State High School - Bunya Campus	s.47(3)(b) - Co		6
<b>Incident Summary</b>							
I, s.47(3)(b) - Cleaner while carrying out my duties in Student Residence No. 5 my right arm rubbed along the edge of the rail resulting in a splinter penetrating the skin. The splinter appeared to be about 20mm-25mm in length. I attempted to remove the splinter myself using a splinter needle from a first aid kit. This proved to be unsuccessful I then contacted my line manager who sent me to a GP.							
3/04/2014	1/04/2014	INC-54928	392	Denison State School	s.47(3)(b) - Cor		15
<b>Incident Summary</b>							
s.47(3)(b) - Cor was making a tackle on a Springsure player and got hit in the head. He was left laying on the ground after the tackle s.47(3)(b) and s.47(3)(b) - C were the first people on the seen. Before he was turned he was asked where his pain was and he said his only pain was in his head. He was left as he was until his breathing had slowed down. He had feeling in his arms and legs, his only pain was in his head none in his neck. He was carefully turned over by s.47(3)(b) onto his back. He had what looked like a bump on the right hand side of his head but he said the pain was on top of his head in the middle. He was asked what his name was, he answered correctly. But was unsure of where he was or what day it was. He wouldn't open his as he said opening his eyes hurt. He breathing was fast. At this point in time s.47(3)(b) - Cont (Sports Trainer) was called over to assist. She assessed him for movement with fingers and toes which was present, pins and needles which weren't. Again verified that no pain apart from in his head which he said had started to ease. After 10 mins after contact he was slowly sat up then helped up to his feet and was assisted from the field to his mother. Advised by s.47(3) to seek medical attention from the local hospital.							
5/05/2015	5/05/2015	INC-77332	330	Doomadgee State School			
<b>Incident Summary</b>							
I was taking a weapon off a student who refused to let go of the weapon. He was attempting to hit another student with the weapon so I gripped on tighter. I had the weapon in my right hand. A few minutes later another student was leaving the Principal office, extremely aggressive and agitated, trying to fight the first student who was now out side the building, and student number 2 pushed passed the Principal and the Acting BSM towards me. He barged towards me and I put my hands up and onto his arms, up near his shoulders to stop his from advancing. I was able to turn the student around so he was facing forwards as I have previously been injured by this student when facing front on. I asked him to breath deeply and calm down, repeating the phrase while the student continued screaming. He took his hat off his head and whacked it backwards on to my legs. The Principal called out the door for community assistance. The student continued screaming and wriggling and I continued to losen my grip. A community member assisted and I assisted him to sit in the chair. As I did I felt my wrist and arm get pins and needles and begin to ache.							
3/05/2013	3/05/2013	INC-34767	889	Drillham State School	s.47(3)(b) - Cd		8
<b>Incident Summary</b>							
Students desks were being trialled in rows. While instructing students, one student had the legs of the chair raised. I tripped over the legs. To save myself from a fall, I turned. In the process, I tripped over another chair legs. Upon which time I felt a strong jar in my lower back with pain radiating out. This resulted in pins and needles and lose of feeling in my leg and feeling of nausea for an extended period of time.

All three were vomitting once back at accommodation. s.47(3)(b) - Co and s.47(3)(b) - Co also felt ill at the laser games and began vomiting there just before they left. Teachers contacted parents and made them aware. Principal approved s.47(3)(b) - Co to use her school corporate card to pay for the medical expenses for 9 students. 9:30pm s.47(3)(b) - Co Contrary to. 10:30pm s.47(3)(b) - Co Contrary to - all received either a table or injection to stop the vomitting. The hospital declared this an epidemic (more than 3 people with illness) and provided sick bags, antiseptic wipes, hydralytes and tablets to stop the vomitting. s.47(3)(b) - Cont became unwell and Sheryl stayed up with her. She started to vomit so afterwards s.47(3)(b) - Co gave her a tablet and she didn't vomit again. s.47(3)(b) - Cont also joined s.47(3)(b) - Co and s.47(3)(b) - Co and was vomitting. Attempted to rehydrate s.47(3)(b) - Co but she kept vomitting. s.47(3)(b) - Co also joined us who had vomitting and diarrhoea. He was given a tablet and eventually returned to bed. s.47(3)(b) - Co was also not well but didn't vomit until an hour before breakfast the next morning. s.47(3)(b) - Co suffered diarrhoea and vomiting again so he took hydralytes and went back to sleep. Students who were unwell remained at the accommodation except s.47(3)(b) - Co as she was feeling much better. Students attended the dinner and quetacon activities that night. s.47(3)(b) - Co and s.47(3)(b) - Co were not feeling well on their return to accommodation. s.47(3)(b) - Co vomited and was given a table and went to bed. No further medical treatment was required by students throughout the night. The next morning 20/2 every student attended breakfast. Teacher s.47(3)(b) - Contr was feeling unwell and vomitting. She took a tablet, did not have breakfast. The bus trip back to Gladstone s.47(3)(b) - Co was sick and lethargic & vomiting on occasions. s.47(3)(b) - Co was also unwell and reported vomiting. Teacher s.47(3)(b) - Contr was unwell and reported vomiting and Teacher s.47(3)(b) - Co was also experiëncing diarrhoea and general unwellness. s.47(3)(b) - Co s.47(3)(b) - Co was vomiting (believed to be motion sickness) as well as s.47(3)(b) - Co s.47(3)(b) - Co and s.47(3)(b) - Co were kept with a sick bag throughout the trip but did not vomit. The DR in Canberra informed teacher s.47(3)(b) - Contr that this was not an unusual event and that it was gastro.

<p><b>Incident Summary</b> Player, s.47(3) was walking out of O5 (returning keys to staffroom) outside of O2 when a student poked her with something in Righ Arm. s.47(3) suspects needle or pin or something similar</p>							
30/07/2013	25/07/2013	INC-40221	2028	Glenmore State High School	s.47(3)(b) - Cor		15
<p><b>Incident Summary</b> Approximately 12:35. Students involved – s.47(3)(b) - Contrary to and s.47(3)(b) - C was walking from my staffroom to AT28 with s.47(3)(b) - Contra. We were walking through the grassed area of Champion Court. On the concrete area there were two boys kicking a football around. The football was kicked in my direction. I tapped the ball back with my foot to the boys and said "Head off to class." One of the boys picked up the football. By this time the boys had walked from the concrete area and were also standing on the grassed area. I continued on my way to the classroom and turned my back to the boys. I was then struck on the ride side of the head/neck with the ball. The ball landed close to my feet so I picked it up. The boys asked for the ball back and I said "You can collect the ball at the end of the day." I walked to the class with s.47(3)(b) and I watched the boys head towards AT21. When I arrived at my class s.47(3)(b) was there and I asked her to look at my neck. s.4 commented that my earring had left a mark on the side of my neck and that the area was red. Initially my ear was ringing and my neck felt tender to touch. I placed an ice pack on the right side of my neck. I started my class but after approximate 20 minutes my neck and shoulders started to seize (tighten) and I had pins and needles in my fingers and my upper arm started to feel numb. I went into the classroom next door and reported to s.47(3)(b) that I was not feeling well and she combined the classes together. I went down to the staffroom and spoke to s.47(3)(b) - Contrary who contacted the office on my behalf to inform them that I had been injured and was going to the hospital. I went up the office and spoke to s.47(3)(b) - C who called numerous doctors surgeries to get an appointment but was unsuccessful. My brother then collected me and took me to the Rockhampton Base Hospital.</p>

<b>Incident Summary</b> The incident occurred on an school excursion to Leslie Patrick Park. The class was at the creek looking at its features. The children were given large plastic tongs to pick up rubbish and put it into a garbage bag to clean up the creek. Before beginning the activity the students were specifically told not to pick up anything with their hands. Before I could stop her, s.47(3)(b) - Contran (yr1 student) picked up a small syringe with her hands right in front of me. It had an orange plastic cover over the needle and when she picked it up she picked it up from the side of the syringe. I did not see it poke into her skin.

**Incident Summary** The student s.47(3)(b) - Cd was experiencing a seizure symptoms between the maths block and middle school block at 12.05pm. Two of my students s.47(3)(b) - Cd and s.47(3)(b) - Contra raised the alarm to me after s.47(3) was laughing with friends and collapsed. According to s.47(3)(b) and s.47(3)(b) s.47(3) eyes then rolled back in her head and she began choking. I went to the location to find that her friends had placed her in a recovery position on her rightside. s.47(3) had her free arm covering her mouth and was still choking like a coughing fit when I arrived. I cleared the students away from the scene and instructed s.47(3) to get a teacher to call for assistance. s.47(3)(b) came to assist and removed the students from the area. kept s.47(3) in the recovery position checked around her and I removed her hand straight from her mouth and asked if she could hear me. s.47(3) did not reply but opened her eyes and looked at me. I asked s.47(3) to let me see in her mouth if she was choking on anything, at this point s.47(3) stopped choking and coughing and the saliva stopped coming from her mouth and she opened her mouth wide and started inhaling deep breaths. I told s.47(3) to remain in this position and keep the breathing calm. The redness in her face dispersed and I asked her again if she was starting to feel better. s.47(3) then said she wanted to sit up. I sat her with her back against the wall. s.47(3) did not look coherent at this stage and was not answering my questions as to how she was feeling. I took s.47(3) hand and asked her to squeeze my fingers which she did. I then told her I was going to ask her some questions and explained I needed her to answer them if that was possible. I asked her the day of the week and she responded with thursday. I asked her what her name was and she responded with s.47(3) and I held up three fingers and asked her how many fingers I was holding and she answered 3. The colour then came back to her face and s.47(3)(b) - Contra came and offered assistance and told s.47(3) that an ambulance was on the way and that her mother had been called. s.47(3) became upset and panicked by the thought of the paramedics arriving and started insisting to only call her mother. s.47(3)(b) - Contra ensured that her mother was on the way and that everything would be fine and then returned to her class. s.47(3) remained with s.47(3) and asked if she could remember what happened prior to her choking. s.47(3) said she couldnt remember anything. I asked her if there was a feeling in her stomach, chest or head first and she said she could not remember. I then asked her if she knew how she ended up on the ground, did she sit or fall and s.47(3) still said she had no idea. She then told me that she felt really sad before it happened. s.47(3) then explained that this was common lately as of the end of year seven and that she takes medication every night for panic attacks. At this moment the ambulance arrived and s.47(3) became hysterical, shaky and very concerned that they were going to give her needles or thumb pricks. I assured her that they would just check how she was and her mum was on the way. The paramedics took over and put her in the van.

12/03/2014	26/02/2014	INC-52912	2132	Kenmore State High School		s.47(3)(b) - Cor	8
<p><b>Incident Summary</b> s.47(3)(b) - Cor was in a group following procedures of a prac on compression. He was compressing some air in a syringe by pushing it against a rubber stopper. He was using his body weight perhaps as leverage?? For some reason he slipped while pushing down, the syringe hit his finger and he started to bleed at the same time he lost balance and fell over. In his fall the back of his head hit the work bench. s.47(3) fell to the ground. At this point students informed s.47(3)(b) - C immediately on what happened. s.47(3) was standing back up at the time and so s.47(3)(b) - C directed him to a tap to wash his bleeding finger. s.47(3)(b) - C was speaking to him and getting him to explain what happened. he could not recall. s.47(3)(b) - C requested him to sit down and grabbed him a chair and helped him sit down while she got some paper towelling for his finger. s.47(3)(b) - C requested him to apply pressure. At this point s.47(3)(b) - C told him not to move until he felt better and if he could to up to the office to be treated for first aid. His friend s.47(3)(b) said he would help bring him up to the office. In this time the bell had rung and s.47(3)(b) - C was informing students of their homework, checking their diaries and allowing them to go. s.47(3)(b) and s.47(3) had left. s.47(3)(b) - C presumed they went to the office. s.47(3)(b) - C rang the office five minutes later to check the s.47(3) had arrived. s.47(3) informed her no-one of that name had turned up. s.47(3)(b) then rang his teacher for his next class and asked if s.47(3)(b) could escort s.47(3) up to the office to be assessed. s.47(3)(b) - C received an email saying s.47(3) was being picked up by his mum.</p>

<p><b>Incident Summary</b> I was walking from the carpark at Avoca street towards A Block when I saw s.47(3) and 2 of her friends standing next to the path. s.47(3) began to slump in her stance and one of her friends caught her. I raced over and gently lowered her to the ground. Once on the ground she began convulsing which lasted a period of about 5 minutes until she began to lose consciousness. I was able to get her to respond and open her eyes quickly but her responses were very vague. She complained about pins and needles in both of her arms. She was placed in the recovery position and had her head/neck supported throughout this time. I continued to ask her questions and found that she had a fall from a horse on Saturday and was airlifted to the Mater Childrens and released on Monday. She said she had damaged ligaments in her shoulder/collarbone and could not remember if she was knocked out when she fell off the horse. A number of times whilst supporting her in the recovery position she complained about pain at the back of her head at the base of her skull. Myself and Amanda Lane continued to monitor and comfort her until paramedics arrived.</p>

<p><b>Incident Summary</b> Student (s.47(3)(b) - Cont) had her Yr 8 immunisation . After a while left the room and went to her class. Feeling faint , she let another student (s.47(3)(b) ) know about the problem. (s.47) came up to the office to let us know, I sent her to tell the nurse. Nurse went down to the student with myself and Teacher aide (s.47(3)(b) - C) was caring for student. We gave her a pillow, water &amp; ice pack. Student wasn't getting any better and didn't want to walk to the office. I came up to the office and got Principal (s.47(3)(b) - Contr) to help us however after him seeing student he asked me to call for an ambulance. Ambulance came, by that stage we also had (s.47(3)(b) - Cont &amp; s.47(3)(b) - Contrary) feeling faint. 2 ambulances came, (s.47(3)) went in one and (s.47(3)) went home &amp; (s.47(3)) felt alright and stayed at school.</p>							
8/08/2014	7/08/2014	INC-62324	349	Landsborough State School		s.47(3)(b) - Cor	11
<p><b>Incident Summary</b> (s.47(3)(b) - Cor) reported to (s.47(3)(b) - C) that (s.47(3)(b) - C) was using her diabetes test kit on other students. The other students involved were (s.47(3)(b) - Cor), (s.47(3)) and (s.47(3)(b) - C). when (s.47) found the children I enquired as to what happend. He got confirmation that it occurred at the port racks. (s.47) could not confirm as to wether each child has used the same needle. (s.47(3)) decided due the seriousness of the issue to escort the students to the principa (s.47) had a diabetes kit in her bag on request from her (s.47(3)) her step mother, the office was not aware of this kit After 2nd Break (s.47) took the kit from her bag and carried over to the courtyard with other students. (s.47(3)(b) - Contrary to) (s.47) proceeded to show the children how to test themselves, then the other students proceeded to use (s.47(3)) test kit to test themselves. The school nurse was rung to ascertain the immediate first aid and medical intervention required for these students. The Landsborough Medical Centre was phoned and spoke to the nurse (s.47) in regards to children sharing the needle for testing of diabetes, she mentioned that this was serious and she was asking further advice from a doctor and a return phone will be made asap. Doctors phoned back and advised to call the Sunshine Coast Health Public Unit (54096600), All parents were rung and asked to come to the school. The father of the diabetic was in Brisbane and couldn't not attend the school. The Sunshine Coast Health Unit returned our call mentioned that they have contacted the Infectious Disease Unit and left a message and was awaiting them to call her back with where we go to from here, (s.47) from the unit has asked us to email her the children's details and parents contact details.</p>

<p><b>Incident Summary</b> In class, s.47(3) bent to tie his shoe laces and his back became sore. He told his teacher who monitored him until lunch 15 minutes. At lunch he said his legs were numb, teacher explained he may have pins and needles and uncrossed his lower legs after asking permission and let him remain in class with friends to eat. Teacher notified Admin 15 minutes later when he still did not want to move. Teacher was aware of some previous back discomfort and contacted Mum. Mum spoke about another incident previously outside school where it was very minor and thought his back might just be sore. She said she would come to school and check on him. Other students re-entered after lunch and students began to work. s.47(3) still did not move but did not appear to be in much discomfort, he just did not want to move his legs. An ambulance was called. Ambulance and Mum arrived. The paramedics reported there did not seem to be any back spasms, they got s.47(3) to stand and walk with assistance. He was in minor discomfort. s.47(3) went home with Mum, after Mum had spoken to paramedics. They did not recommend he travel to hospital.</p>

11/08/2015	6/08/2015	INC-84234	1906	Mount Warren Park State School		s.47(3)(b) - Cor	11
<b>Incident Summary</b>							
<p>Student, s.47(3)(b) - C walked into the school grounds via the front gate with what appeared to be a used syringe in his hand. (needle was pointing out from his body). Deputy Principal, s.47(3)(b) - Cd opened Office door to walk out to a class and saw him with the syringe. s.47(3) said, "Look what I found s.47(3)(b) -". Deputy noticed that s.47(3) had touched the end of the needle with his fingers and directed him to not touch the needle. Deputy steered him into the office area away from others and into sick bay area instructing him to place the needle in the sink on top of paper towel. Deputy then informed the other Deputy Principal, s.47(3)(b) - Co and Principal, s.47(3)(b) - Co about the situation. The needle was then removed and placed in a syringe disposal container and s.47(3) was given soap to wash his hands. Admin officers were instructed to contact parents about the situation however there was no answer on any contact numbers. s.47(3) was asked where he found the needle and he told them outside the school grounds, near the gate on the ground and that he had picked it up. Deputy asked if the needle sharp had pierced his skin anywhere on his hands or body area to make sure that he wasn't hurt. s.47(3) said "no" however Deputy checked his hands for marks. Deputy has for clarification about a red mark/scratch but s.47(3) said that was old. Deputy went to Principal to discuss plan of action due to parents being uncontactable. When Deputy returned to s.47(3) he had one of his tracksuit pant legs pulled up and he was looking carefully at it. Deputy asked if he had a mark on his leg from the needle. s.47(3) shook his head and pulled his pant leg down however not long after had his pant leg up again and was looking at it. Deputy told s.47(3) that he wasn't in trouble, but that we needed to make sure he was safe and asked again if the needle had gone into his legs. s.47(3) said that he had accidentally stabbed himself with the needle and when the Deputies and Principal looked there was a small dot red mark on his leg. Deputy and Principal explained that he might need to go to the Doctor and that we couldn't get hold of his parents so we would drive to his house and inform them of the situation and if needs be, drive s.47(3) to the house. s.47(3) took the Principal and Deputy Principal to the exact place where s.47(3) had found the syringe and they then checked along the front of the school to ensure there wasn't another syringe.</p>

7/03/2016	4/03/2016	INC-96337	7574	Murrumba State Secondary College		s.47(3)(b) - Co	7
<p><b>Incident Summary</b> s.47(3) had her immunisation injection then sat outside after her needle for her 15 minute resting time. Students came to get me at 2:40pm saying s.47(3) wasn't feeling well and had the shakes. I asked s.47(3)(b) - to check on her as I was busy with other students and sending students in for their needles. He gave her some cold water and checked on her as we were instructed to do by the nurses. I then checked on her and she said she was ok and she'd let us know if she got worse. Students came in a few minutes later and said that s.47(3) wasn't well, shaking and she thinks she's having the symptoms that she has before an epileptic fit. s.47(3)(b) went out to her and she explained that to him. s.47(3)(b) - came and got me. He explained that s.47(3) felt like she was having the warning signs of an epileptic fit. I went out and she had her arms up in the air and was shaking. I asked her how she was. She explained that she was having the signs that lead to a seizure. I asked her when the last time she had a seizure was and she said 2 years ago. I asked are you still prone to getting them, she said yes my paediatrician (stumbled to say the word) said I can get them at any time and I'm having the symptoms before I have a fit. I reassured her that she'll be ok. I spoke to the nurses who were dealing with a student who was feeling faint and they said to call the first aid officer and move her away from here, contact dad to give him a heads up. They weren't concerned as much as she was and they said moving her away from students would be beneficial for her. The nurse stated that if she does have a seizure the office/first aid person will call an ambulance. I rang s.47(3) to get the wheelchair and administer first aid and mentioned that s.47(3) had had a possible reaction to the injection and she thinks she thinks she's having symptoms before a seizure and I had spoken to the nurses and at the same time s.47(3)(b) - rang her dad (as instructed to by the nurse) to inform him of what was going on and he said he was on his way. s.47(3) came and collected s.47(3) with the wheel chair and took her to the office. s.47(3) was collected by 2:45pm by s.47(3)</p>

<b>Incident Summary</b> Study tour student s.47(3)(b) - Contrary to Publicate a pistachio nut offered to him by s.47(3)(b) - Con. s.47(3)(b) is his study tour buddy. s.47(3)(b) started to get an itchy tongue and feeling a little difficult with his breathing. He came to International Department and wanted to speak to the Japanese Study Tour Coordinator. They came directly over to Administration Sick Bay. WE asked the Coordinator s.47(3)(b) - C and s.47(3)(b) - Con if the student in question was anaphylactic. We advised them that we would be calling 000 if this was the case. They said that he was. We asked if he had his epipen and he did not. We asked him does he have an epipen. He said he does. He did not have it with him in Australia. s.47(3)(b) (Australian Agent Coordinator JAS) requested ambulance. 000 called. On advising the situation and s.47(3)(b) condition and that PBC had the school Epipen, 000 support advised to administer it now s.47(3)(b) - Con administered the EPIPEN direct into his left thigh, held it for the 10 seconds and then massaged the needle site. Present were the Sick Bay Coordinator s.47(3)(b) - Cor and the Japanese Study Tour staff. s.47(3)(b) - Cont stayed on the phone to 000 whilst this was happening to ensure that any information they were giving was conveyed. WE sat with the student and remained on the phone until the AMBULANCE officers arrived.

<b>Incident Summary</b> s.47(3) states the following: She came in the workplace (Port Curtis Road State School) during the school holidays to gennie the concrete areas under A & B Block. This cleaning involved using the gennie for extended periods of time to clean underneath these buildings. It wasn't until the end of the week she started noticing her right hand/wrist aching and starting to have pins and needles. This aching feeling and discomfort was starting to keep her up at night. She did speak with both s.47(3)(b) - Cont - Prinicpal and s.47(3)(b) - Teacher when term 2 started (approximately the 15th April 2013) about the aching and discomfort that she was experiencing at night from her wrist. s.47(3) did state that she broke her wrist on her right hand approximately 7 years ago in 2005 during her continued employment at Port Curtis Road State School : as explained to me by s.47(3)(b) - Cont on Friday the 26th April 2013 at 8.40am.							
9/10/2015	9/10/2015	INC-87889	2090	Proserpine State High School		s.47(3)(b) - Con	16
<b>Incident Summary</b> students were practicing threading a machine. They were given the option of having power on at the machines to give light for threading but to put the peddle away from their feet so a not to start the needle. s.47(3)(b) - was trying to thread the machine and her partner s.47(3)(b) - C moved her foot under the table which moved the needle. The needle went through s.47(3) finger nail and finger.

------------	------------	-----------	------	-------------------------------	------------------	--	---

**Incident Summary** Whilst I was on playground duty at F Block (Area 6), s.47(3)(b) - Contra approached me to let me know that his friend s.47(3)(b) - Contrar (Year 10) had been hurt. I went with s.47(3)(b) immediately and assessed the situation. s.47(3)(b) appeared to be in a lot of pain and told me that he was finding it hard to breath. He was hunched over, pale and shaking, and groaning. He told me that a friend had landed on him when they were play fighting and that his friends head and shoulder had hit him hard in the ribs. I told s.47(3)(b) not to move, radioed for the Hot Spot on PGD, and sent student runners to the Performing Arts staffroom (nearest building) to ask a teacher to contact First Aid. I crouched next to s.47(3)(b) and asked him to try to take slow breaths if possible and told him that people from First Aid would be with us shortly. It was at this point that I heard a popping noise followed by a gurgling noise. s.47(3)(b) groaned and exclaimed loudly "It's popping again!". He was quite panicky and I calmly asked him to stay still. s.47(3)(b) who I had asked to remain with us told me that he had heard the popping noise when s.47(3)(b) had first attempted to get up after being hit. At this point, I asked a number of other students to please go to the PA again and ask a teacher to contact First Aid and ask them to contact an ambulance. Soon after, s.47(3)(b) - C and s.47(3)(b) - Contra approached us to provide support. I thanked the students who had delivered the messages and asked them to return to their classes. s.47(3)(b) - Contra and I stayed with s.47(3)(b). We reminded him to try to stay calm, to take slow breaths and to stay still. As s.47(3)(b) was crouched, s.47(3)(b) and I offered our hands as support if he needed to adjust his position to become more comfortable. We also asked if he wanted to lean on his bag. s.47(3)(b) - arrived and contacted s.47(3)(b) - mother, she let him know that an ambulance was on the way and that she would ride with s.47(3)(b) in the ambulance and meet with her at the hospital. As the ambulance had not yet arrived, I called to see if there was a delay and to relay s.47(3)(b) - symptoms. I left s.47(3)(b) with s.47(3)(b) - Co and s.47(3)(b) when I did this as I did not want to further distress him. The ambulance personnel assured me that an ambulance was on its way and told me to keep s.47(3)(b) still. Whilst we were waiting for the ambulance s.47(3)(b) explained that his group of friends often play fight or "muck around". He said that the group would watch out for teachers and stop play fighting when a teacher was seen nearby. When the teacher had walked away, they would resume play fighting. He said that today, some of the boys in the group had taken it too far and had stomped on people whilst they were on the ground. I told s.47(3)(b) that this behaviour needs to stop and that I would be reporting on it further. The ambulance arrived soon after and was guided into the school by two senior students (as arranged by s.47(3)(b) - Co whose class was close by). The ambulance officers assessed s.47(3)(b) and offered him pain medication, which he refused. s.47(3)(b) had small cuts/abrasions to his hands as a result of the play fighting and complained that they were too sore to have a needle put into. They assisted him to stand and move to a stretcher. They asked if they could remove s.47(3)(b) - shirt but he would not cooperate. They informed him that it would be cut off by hospital staff. They moved s.47(3)(b) to the ambulance and s.47(3)(b) - left with them to go to the hospital. s.47(3)(b) was asked to report to class.

<b>Incident Summary</b> PUSHED A DRILL DRIVER BIT INTO MY LEFT LITTLE FINGER NAIL. PUNCTURE WOUND TO FINGERNAIL.							
2/07/2015	2/07/2015	INC-82053	6675	South East Region - Robina Office	s.47(3)(b) - Cor		14
<b>Incident Summary</b> I took delivery of a new chair - which is quite heavy. To place the chair behind my desk, the only access is a narrow opening (approx 50 cm) between my desk and another workstation next to me. As the base of the chair is wider than the opening, a colleague helped me lift the chair over the top of the hutches on the 2 desks (approx 110cm high). As I lifted the chair I felt a pain in my right wrist. My wrist has a 'pins & needles' feeling which has led to numbness in my right thumb. The tingling continues, and my entire thumb is numb and has little feeling.

<b>Incident Summary</b> Was removing old washing machine to install new machine... while removing the packing from new machine I was lifting/balancing the washer while removing the packing base, my shoulder gave way and i felt it roll or pop out.. as I dropped my arm to release the washer my shoulder popped back into place. Within 10-20 min my elbow and left little finger started pins and needles and began to numb. I informed s.47(3) my WHS.							
31/03/2015	31/03/2015	INC-75934	62	Sunnybank State School	s.47(3)(b) - Co		7
<b>Incident Summary</b> I was standing at the front of student desks separated by an aisle. All students were seated with a task and I was going around checking their work. A student needed assistance, so I stepped forward to walk down the aisle (which was clear when I had checked just a moment before), but instead of my left foot landing on the floor, I stepped on a student's foot shod in a strong leather shoe and twisted my hip and leg while trying to right myself. I had strided forward putting the weight on my left leg, so the accident jarred down that side. I continued to teach from a seated position and noticed after 10 minutes that my left foot had pins and needles.

------------	------------	-----------	----	------------------------	-----------------	--	---

**Incident Summary** I had just signed off in Cleaner's Store Room and gone upstairs to the Admin office to let s.47(3)(b) - Cd know I was leaving for the day to go to an appointment. I checked with her to see if I am allowed to work ADO hours during school holidays [I wasn't allowed at my last School]. I exited the building through the main door on Eddington Street, and was busy rearranging the mat that is usually placed outside. It had fallen when I opened the door. I was not paying sufficient attention, and slammed the door on my finger in the process. As I was running for an appointment, I kept going. It initially hurt really badly, and when I got to my appointment they gave me a glass of water with ice in it to place my finger in. I was wearing Jamberry wraps [vinyl decals that adhere to the nail surface] on my nails, so couldn't see the extent of the damage. As the pain had subsided a bit, I chose to muddle through, but got little sleep that night. The following morning, 19/01/2016, at about 5.50am, I was working in E block and lifted a student desk. I accidentally jabbed the end of my finger against it, reacted and dropped the desk on my foot - which WAS in an enclosed shoe, the same approved shoes I wear every day to work. I managed to badly bruise underneath the toenail of my right big toe, and limped from After work, I went to my Doctor's surgery. My usual Doctor is away, and I saw another Doctor attached to the surgery. She used a hypodermic needle to make holes in both nails - left index finger and right big toe. The blood under the finger had dried and did not flow, but the blood under the toenail was still fluid, and exited the cavity under the nail under some considerable pressure. The toe has felt fine ever since. The Doctor sent me for an X-ray of the finger, and the radiologist told me that it wasn't broken. On the 20/01/2016 at 9.15am, I saw the Doctor again and she confirmed that the finger is not broken. She has restricted some of my work processes, but is allowing me to resume work on 21/01/2016.

3/06/2014	30/05/2014	INC-58232	2401	Sunshine Beach SHS - Special Education Program	s.47(3)(b) - Co		15
-----------	------------	-----------	------	--	-----------------	--	----

**Incident Summary** Student complained of a headache and at this point did not want to go home or have his parents contacted. During lunch break the student dropped his drink and said he could not feel his hand and complained about having pins and needles and blurry sight. An ambulance was contacted and he was transported to hospital. It was not until later did the student mention he was dropped on his head earlier in the day whilst playing football at morning break time. He also had nothing to eat all of that day.

24/07/2015	22/07/2015	INC-82880	2108	Sunshine Beach State High School	s.47(3)(b) - Cd		15
------------	------------	-----------	------	----------------------------------	-----------------	--	----

**Incident Summary** s.47(3)(b) - Con Teacher reported that s.47(3) at the finish of the relay event required first aid - ice afterwards due to evidence of muscle strain behind the back of the knee. Student went back to house afterwards and seemed okay. Later (approximately 30 mins) the students alerted staff that s.47(3) need further assistance. s.47(3)(b) - Cd (staff member) attended to s.47(3) and ambulance was called. s.47(3)(b) - Cd reported - Students alerted me that s.47(3) was in significant pain. When I approached her she said she had shooting pains in her calf, behind her knee and her hamstring. She also said she had pins and needles in her left toes. Further examinations and prior knowledge of a lower back injury led me to investigate the lower back in relation to the sciatic nerve. s.47(3)(b) - Cd did a further examination and s.47(3) mentioned she had less feeling and sensation in her left leg compared to her right. Due to her history of back injuries I was led to believe she had further damage to her lower back and treated s.47(3) as a spinal injury, therefore an ambulance was called.

10/02/2014	10/02/2014	INC-50270	945	Torquay State School		s.47(3)(b) - C	7
<p><b>Incident Summary</b> s.47(3)(b) - Co and I were walking a student back into the school grounds after she ran out after her mother. The student was very upset, kicking, screaming and yelling at us. I had my right hand under her left arm in a pistol grip and my left hand (palm open ) under her left wrist. The student kicked me in the right shin twice and dropped to her knees on three occasions. I felt a needle like pain at the back of my neck. Once we had the student in the Deputy's office I applied some ice to my neck and took 2 panadol.</p>

<b>Incident Summary</b> During eating duty several students reported to me that Student had hit them very hard in the head with their lunchbox. I approached Student and he hit towards me with his hat. I stated that he was hitting other students and he needed to go to the garden. He yelled and growled at me and refused to move. I continued to tell him he needed to move, he refused and hit me with his lunchbox in the left arm twice. I held him by the arm and guided him to the garden, he kicked me in the right ankle while moving. At the garden he refused to sit down, yelling at me that i couldnt make him. I sent a student upstairs to find a teacher on duty, when I turned to speak to the student Student again hit me with his lunchbox into my back. I told him that if he hit me again I would call the police. He struck me a again in the left arm with his lunchbox and kicked me in the right leg. I let the other teacher on duty know I was taking Student directly to the office. He refused to go and swung his hat at me. s.47(3)(b) - Co came down and directed s.47 to the office. He refused at began yelling. s.47(3)(b) - Co took him to the office but Student returned to the eating area screaming abuse at students at the teachers. My left arm continues to have pins and needles in it from the assault.

<b>Incident Summary</b> Students were putting their recorders back in the bucket I, teacher was collecting their recorder sheets. As I have turned to put the sheets on my desk I have been stung by something above my elbow. I turned and asked the students what hit me and they told me a piece of recorder. I asked who threw it and found out that a student had taken the bottom piece of his recorder off and was trying to hit it with the rest of his recorder like a softball bat. I asked him who he was aiming for and he said no-one. He was just trying to hit the piece of recorder. When the student hit my arm it made my hand go pins and needles.

<b>Incident Summary</b> I pricked my finger while disposing of needle, after giving a diabetic student their insulin.							
29/07/2015	29/07/2015	INC-83200	2015	Warwick State High School	s.47(3)(b) - Co		11
<b>Incident Summary</b> Account as per s.47(3)(b) - C At the end of the theory lesson the students were being instructed on how to generate a doughnut bandage. The box which contained the bandages also contained a training Epi pen. The students were going through the physical motions of the training epi pen. I ended up talking about the uses of an epi pen and how to use the device. The students were then moving around the classroom completing their doughnut bandages and getting another bandage to secure the doughnut bandage. I believe at that time one of the students picked up the extra epi pen (live), I was not aware that it was in the box, and attempted to inject it in to another student as part of the training epi pen procedure. The epi pen was live and slightly scratched the student drawing blood. The student injecting the epi pen attempted the injection in the forearm and not into a large muscle group and not held in as per procedure, therefore, there is little reason to suggest that a proper injection took place s.47(3)(b) - C school nurse, walked by the class room and assessed the student. There was no immediate signs or symptoms of the injection and was therefore given the all clear from the nurse.							
24/06/2014	24/06/2014	INC-59918	2015	Warwick State High School	s.47(3)(b) - C		16
<b>Incident Summary</b> Year 11 Home Economics Lesson While using a sewing machine the machine needle has entered through the fingernail of left index finger and has gone all the way through the finger exiting on the underside. The needle has exited in reverse out of the finger. The needle was bent and the tip of the needle may have broken off.

<p><b>Incident Summary</b> Approx 12.20pm s.47(3)(b) - Contr received a call from a member of the public who backs onto the school saying he has just witnessed a middle aged couple injecting themselves on school property. He had rang the police who said they were on the way. I (s.47(3)(b) - Co) then went down to the Music block (E block) to observe the pair. s.47(3)(b) - Cor was watching them as they sat on the border line of the school still on school property. s.47(3)(b) - (arrived and said he would watch while we took a class of students to the Main hall for a lesson. s.47(3)(b) then returned to his room, I remained with s.47(3)(b) - Contran who was instructing students. I then noticed that the pair had started to walk towards the Senior playground near the hall. I decided after observing them staggering slightly to close and lock the doors to the school hall which I did. I then noticed s.47(3)(b) and s.47(3)(b) - C observing them from a distance of their movements. The couple then began walking down the pathway heading towards the Prep area so I rang the Prep classes and told them to lock all doors till further notice. At this point I lost sight of the pair and contacted Admin via the office who had rang the police at approx 12.30 informing them of the situation. I then saw a Police officer run across the oval and speak to s.47(3)(b) and s.47(3)(b) - . I then say that another officer was talking to the two people we were observing. The Police officer looked in the drain area where the pair had been injecting and found 2 used needles down the drain. s.47(3)(b) - then searched the grounds near the drain for any other needles.</p>

<p><b>Incident Summary</b> Discovery of syringe in porta loo</p>							
18/08/2015	5/08/2015	INC-84693	2123	Yeppoon State High School			
<p><b>Incident Summary</b> The student realised after the bell went that the sharps container and needles were missing. She reported it to Mr. Willis and myself. We looked for the items during the lunch break and having not found them we spoke to the class involved during the next period. A female student then told me that she had seen the sharps container in a sanitary bin in the G-Block girls toilets. The sharps container was there and the bin was placed in the staffroom away from student access. The unused needles have not been found.</p>
