Red Hill Special School campus amalgamation

Delivering new facilities to support teaching and learning

Red Hill Special School's Waterworks Road campus and Ithaca campus will be amalgamated into one site at its Ithaca campus site (formerly Ithaca TAFE) at Fulcher Road, Red Hill.

The former TAFE campus will undergo a purpose-built, major transformation to accommodate the learning needs of up to 120 children with disabilities and high needs. (Unfortunately some information flyers were distributed with an incorrect capacity figure, which has been rectified.)

The local community and Red Hill Special School parents and carers are invited to have their say on the major building refurbishments and changes this may have on local traffic, pedestrian, cycle and bus access, and student safety initiatives.

The Red Hill Special School concept site plan is included overleaf and shows the proposed site of the campus amalgamation.

Community engagement sessions

Drop-in community engagement sessions are being held:

SESSION 1

Venue: Dean Street car park, Red Hill Special School

Date: Thursday, 16 May 2024
