

RTI 194084

The value of the maintenance register at 30 June 2018 was estimated at \$146 million. The value of the maintenance register at 30 June 2019 was estimated at \$147 million.

The Queensland Government is in its largest building phase in this state's history with \$1.5 billion allocated in the 2019–20 State Budget to build, maintain and improve Queensland state schools.

The Department of Education (the department) has one of the largest asset portfolios in government — a \$19 billion asset portfolio covering over 35,000 learning spaces and support facilities (including classrooms, halls, labs, sheds, covered walkways and shade structures) across 1,241 Queensland state schools, some of which are in Australia's most geographically isolated locations.

With so many sites spread across such a diverse and large area, spending money on maintenance, including preventative maintenance, is not only inevitable, but is also essential and depends on a range of factors including:

- major operating infrastructure, for example lifts;
- the condition of buildings;
- differential costs related to building types (multi-storey buildings, building materials, heritage-listed buildings);
- local environmental factors (such as location, topography, soil type, coastal areas, rainfall); and
- impacts of disasters such as fires, vandalism, storms and flooding.

Since 2015, the department has significantly reduced the estimated value of the maintenance register from \$214 million in 2014–15 to \$147 million as at 30 June 2019. This has been achieved through delivering a range of rolling maintenance and renewal programs and taking an asset life cycle management approach.

In response to an audit of Maintenance in Public Schools by the Queensland Audit Office (QAO) in 2014-15, the Queensland Government committed to maintaining maintenance funding at a level equivalent to at least one per cent of asset values.

In a further follow up audit tabled in Parliament in April 2019 (<https://www.qao.qld.gov.au/reports-resources/follow-maintenance-public-schools>), the QAO recommended schools develop three-year maintenance plans for all school buildings with a replacement value greater than \$100,000, including key preventative maintenance elements, such as roofing, drainage and painting.

The Department has developed an implementation plan to support schools in the preparation of these plans and is rolling out this process.

The Queensland Government is investing \$225.708 million in 2019-20 for maintenance works, including preventative maintenance, in Queensland state schools and will continue to invest significant funding for maintenance works as a part of our commitment to delivering well-maintained learning facilities to provide our Queensland students with world class educational facilities.

Maintenance projects, including preventative maintenance, in our state schools and across our portfolio are prioritised based on factors such as health and safety. Needs are assessed at a local level and it is normal for maintenance requirements to fluctuate depending on the outcome of asset condition assessments and the works performed.

Works are often completed during school holiday periods to minimise disruptions to teaching and learning.

Schools can manage their own maintenance or use the whole-of-government Department of Housing and Public Works' Building and Asset Services (BAS). Therefore, the status of individual maintenance projects is not collated centrally. School prioritise the works to be performed from their annual maintenance allocations.

Please find attached a list of the 10 schools with the highest maintenance assessment, including preventative maintenance, in the Metropolitan region, as requested.
